

AS9100-CERTIFIED PRECISION MACHINE SHOP

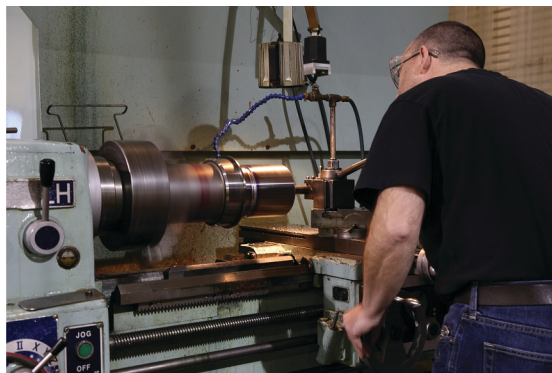

A Perfect Fit

Whether it's a R&D or first article piece article, a short run production order or a long-term blanket production order, Win-Tech is your go-to custom order machine shop.

We work with you to ensure your needs are met - commercially-based or aerospace-based, our AS9100 Certification enables us to maintain the highest level possible of quality precision machined parts.

Our employees are among the best in the industry. When an operator, programmer, or purchasing agent is working on your project, your order is our priority. Our team is both skilled and passionate about what they do.

Contact our Product Development Manager, John Hudson, to schedule your tour of Win-Tech or visit our website for a virtual tour.

Win-Tech is actively involved in the community and participates in Manufacturing Day each October with a mission to get the next generation of manufacturers excited about the industry.

Employees volunteer their time with local high school robotics teams as well as the National Tooling and Machining Association (NTMA), Women in Manufacturing (WiM), the Georgia Manufacturing Alliance (GMA), the Cobb Chamber of Commerce and its leadership programs, and the Chattahoochee Technical College Foundation.
