

AS9100-CERTIFIED PRECISION MACHINE SHOP

AS9100-Certified and Quality Focused

Win-Tech is an AS9100-Certified Machine Shop.

Whether producing single pieces or high volumes, we give each project our full attention.

Our quality control process conforms to what many contractors and companies still refer to as MIL-I-45208A.

Close tolerance manufacturing is our specialty. Our precision measuring and gauging equipment includes a CMM, digital optical comparator and a wide range of height gauges, micrometers, thread plug and ring gauges, along with gauge blocks and standards, all independently calibrated on a periodic basis and traceable to the National Institute of Standards and Technology.

Win-Tech's attention to quality is apparent in the detail of all our processes and careful inspection of our work.

Among many pieces of equipment that make up its quality control department, Win-Tech uses a ONE Shop Floor Model 7107 CMM from Brown & Sharpe as well as a 9 foot Infinite Portable Arm PCMM from Romer Cimcore.
