Now is the time to protect what is most important. As our digital footprint expands, fraud and scams increase exponentially, along with vulnerabilities that result from having sensitive personal information exposed. It's why **IdentityForce** offered through Cigna⁴ will be included in your Cigna medical coverage at **no additional cost**. We're here to provide you with **award-winning** identity theft protection built to proactively monitor, alert, and help fix any identity theft compromises.

WHY NOW?

Our identities have become more than just a name, birthdate, and social security number. Today our identities include voice signatures and fingerprints, personal property records, health records, and even social media data. All of these details can be capitalized on by criminals to commit identity fraud, whether used directly in forms of synthetic identity theft, or used in social engineering attempts to extract money or personal details that provide additional opportunities for identity crimes.

ID THEFT IMPACT

No one should have to deal with a lifetime of damage that could result from identity theft. We all likely know someone who has already been a victim of identity theft themselves, or had their good name compromised. Security incidents, scams, and fraud continue to grow as our world becomes increasingly digitalized and virtual, and protecting personal information is essential.

We not only proactively monitor the Dark Web, credit reports, and real-time fraud issues, but we will help fix any compromises to personal information. We'll make sure a customer's identity is restored without the burden of phone calls and paperwork.

LOST TIME SEVERE EMOTIONAL DISTRESS COST 6 MONTHS and 77% Reported Average LOSS INCREASED **100** to **200** of \$1,343 Hours Worth of Work Stress Levels per ID Theft Incident SANS Institute.
